01 / ATHLETE PERFORMANCE OVERVIEW

YOUR GAME. IN FOCUS.

Alex Taylor

Fictional athlete / Under 16 domestic / Guard

EXAMPLE GAME PERFORMANCE RATING

7.2 / 10

A game-specific view of decisions, execution and contribution. This is not a permanent measure of ability or future potential.

GAME SUMMARY

Alex created useful spacing and competed consistently on defence. The clearest opportunities were attacking open closeouts sooner, improving help-side awareness and moving with purpose after passing.

WHAT IS WORKING

Stayed engaged after mistakes, supported teammates and recovered quickly after being beaten. Relocated to offer a passing outlet on several possessions.

WHERE TO FOCUS NEXT

Turn good recognition into earlier decisions. Use the space available before the defence recovers, and check both the ball and the cutter when away from the play.

How to use this report
Read the game overview, then work through the three priorities on page four. The aim is a clear next step, not a list of everything to change.

All names, scores and observations in this example are fictional. Actual reports are personalised to the athlete, their role and the game observed.

02 / SIX-CATEGORY SCORECARD

THE WHOLE GAME.

Six areas show where the athlete contributed and where the next adjustments may help.

Offence 7/10

Recognised space; sometimes delayed the first attack.

Defence 8/10

Strong recovery effort; help-side checks can improve.

Off-ball movement 6/10

Useful spacing, but too often remained still after passing.

Basketball IQ 7/10

Saw several good reads; could act earlier as the defence shifted.

Confidence & body language 8/10

Stayed engaged after misses and continued supporting teammates.

Leadership & communication 7/10

Encouraged teammates; earlier defensive calls would help.

Scores reflect this game. Where there is not enough evidence, a category is marked Not Observed. Quietness alone is not treated as low confidence or poor leadership.

03 / WRITTEN COACHING OBSERVATIONS

WHAT I SAW. WHY IT MATTERS.

01 / ATTACKING OPPORTUNITIES

Observation
Passed up four good attacking opportunities despite having space to drive.

Coaching feedback
You recognised the gap but paused before committing. That gave the defender time to recover. The next step is an earlier decision based on the closeout and help defence.

02 / HELP-SIDE POSITIONING

Observation
Lost sight of the cutter twice while watching the ball on the opposite wing.

Coaching feedback
Your effort was there. The adjustment is where you stand and what you check: an open stance can help you see both the ball and your player before the cut starts.

03 / MOVEMENT AFTER PASSING

Observation
Stayed in the same spot on three possessions after passing to the wing.

Coaching feedback
Once the ball moves, the defence moves too. A purposeful cut or relocation can create a new passing angle instead of allowing your defender to rest.

Selected examples illustrate the coaching process. They are not a complete official statistics record or a diagnosis of the athlete's mindset.

04 / YOUR NEXT-GAME ACTION PLAN

THREE PRIORITIES. ONE GAME.

Keep the focus small enough to use. These sample priorities connect directly to the observations on the previous page.

01 Attack the open closeout

When a closeout gives you space and the help defender is not set, make an early decision to attack. Trust the read rather than waiting for a perfect result.

After the game: which open gaps did you use, and which did you hesitate on?

02 See the ball and the cutter

When you are on the help side, open your stance and check your player as the ball moves. Be ready before the cut starts.

After the game: did you spot cuts earlier and arrive in a useful help position?

03 Move after the pass

After passing, read the space. Cut when the lane is open or relocate to give the ball handler a clear outlet.

After the game: did your movement create a passing option or space for a teammate?

Your completed report contains priorities selected for your athlete. No score, selection outcome or performance improvement is guaranteed.
